

# Applied Underwriter is the leading software for insurers to access the largest network of brokers.

**Communicating seamlessly via web services with Applied Relay's suite of distribution and back-office broker solutions, Applied Underwriter offers a high level of control, supporting all aspects of the insurance lifecycle.**

Applied Underwriter offers a unified solution for managing the full spectrum of insurance processes end-to-end, including policy issue, billing, service and premium accounting.

The application also supports a high level of interoperability with a range of Microsoft and other third-party products and provides users at all levels with the tools they need to be productive. Offering seamless access to the largest network of Ireland's general insurance brokers, Applied Underwriter enables new products to be launched quickly and with a high level of underwriting control.

**“ Applied Underwriter's real-time acceptance and the ability to link Polaris from a rating perspective is superb. ”**

Simon Richards, Managing Director, Footprint Underwriting

## Enables your business to

- Seamlessly access the largest network of Ireland's general insurance brokers.
- Expedite submission processing and accelerate time to market.
- Automate quote turn-around and lower cost.
- Enable new products to be launched quickly with a high level of underwriting control.
- Easily manage documentation and automatically index outgoing documents and correspondence.

# Core Capabilities

## Account reconciliation

Automated broker statement reconciliation; single entry for client, broker and company transactions; client premium account tracker; rich financial reporting, including daily cashbook and cash allocation analysis.

## Advanced reporting

including Loss Ratio by Product/Agent, Claims Analysis, Triangulation Data and Carrier Bordereau. All data is exportable to Excel for further interpretation by third-party reporting tools.

## Broker management

Seamless integration with Applied's broker network provides full channel sales, distribution, accounting, claims, account reconciliation and policy administration capability for end-to-end broker relationship management.

## Claims

Support all lines of business with a comprehensive claims ledger and manage claim reserves through to settlement with full reporting capability. Easily configure and maintain claim forms and code lists to meet individual needs

## Document management

Automate indexing and storage of all outgoing documents and correspondence. Retrieve documents with ease against client, policy account or claim, as well as accept secure document delivery via eDoc exchange.

## Dynamic rating engine

Maintain, update and deploy rates in real-time while creating, changing and effecting new policy wordings with ease. Complete policy fulfilment at the point of sale via both desktop and web applications, as well as asses lost business through detailed profiling to provide a full audit of all risks quotes.

**More than 95 percent  
of the leading insurers'  
business is bound  
via Applied**
